

## ZVEST: faithful vs. loyal

<https://www.difference.wiki/loyal-vs-faithful/>

The main difference between the words loyal and faithful is mainly of the intensity and the attributes that carry along with the two terms. The term **loyal** refers to the affiliation and allegiance towards someone or something i.e. people, organization, sect, country, etc. on the basis of returned benefit and assistance. Whereas the term **faithful** moreover focuses upon the self-devotion and givenness of everything to anyone or towards anything without considering anything in return.
